
NEWS RELEASE
IMPACT Silver Corp.

For Release: June 06, 2017

Trading Symbol: “IPT: TSX.V”

IMPACT Silver divests non-active Zacatecas assets

IMPACT Silver Corp. (“IMPACT” or the “Company”) announces that it has sold its Zacatecas assets to Endeavour Silver Corp. (“Endeavour”; TSX: EDR, NYSE: EXK) for 154,321 common shares of Endeavour with a deemed value of US\$500,000. The Zacatecas assets consist of 10 mineral concessions covering 152 hectares, 14 hectares of surface rights, the old inactive Santa Gabriela 200 tonne per day processing plant and tailings facilities. IMPACT has carried out only minimal work in Zacatecas since 2009 and management took this opportunity to monetize these non-active assets and allow management to better focus its time on its silver production assets at the Royal Mines of Zacualpan and new ventures.

About IMPACT Silver:

IMPACT Silver Corp. is a silver producer with two processing plants on two adjacent projects within its 100% owned mineral concessions covering 357km² in central Mexico: the Guadalupe Production Centre and the Capire Processing Plant. At Guadalupe, three underground silver mines feed the central 500 tpd processing plant located within the historic Royal Mines of Zacualpan Silver District. At Capire, the 200 tpd processing plant and open pit silver mine are on care and maintenance waiting for a recovery in silver prices. Additional information about IMPACT and its operations can be found on the Company website at www.IMPACTSilver.com.

On behalf of IMPACT Silver Corp.,

“Frederick W. Davidson”
President & CEO

Forward-Looking and Cautionary Statements

This IMPACT News Release may contain certain “forward-looking” statements and information relating to IMPACT that is based on the beliefs of IMPACT management, as well as assumptions made by and information currently available to IMPACT management. Such statements reflect the current risks, uncertainties and assumptions related to certain factors including but not limited to, without limitations, exploration and development risks, expenditure and financing requirements, title matters, operating hazards, metal prices, political and economic factors, competitive factors, general economic conditions, relationships with vendors and strategic partners, governmental regulation and supervision, seasonality, technological change, industry practices, and one-time events. Should any one or more risks or uncertainties materialize or change, or should any underlying assumptions prove

incorrect, actual results and forward-looking statements may vary materially from those described herein. IMPACT does not assume the obligation to update any forward-looking statement.

The Company's decision to place a mine into production, expand a mine, make other production related decisions or otherwise carry out mining and processing operations, is largely based on internal non-public Company data and reports based on exploration, development and mining work by the Company's geologists and engineers. The results of this work are evident in the discovery and building of multiple mines for the Company and in the track record of mineral production and financial returns of the Company since 2006. Under NI43-101 the Company is required to disclose that it has not based its production decisions on NI43-101-compliant mineral resource or reserve estimates, preliminary economic assessments or feasibility studies, and historically such projects have increased uncertainty and risk of failure.
