

IMPACT SILVER CORP

ENVIRONMENTAL POLICY

October 1, 2025

Purpose and Commitment

IMPACT Silver Corp. (“IMPACT” or the “Company”) recognizes that our exploration and mining activities have direct and indirect effects on the environment. We are committed to conducting our business responsibly by minimizing adverse impacts, enhancing environmental performance, and supporting sustainable development in the communities where we operate.

IMPACT strives to meet or exceed all applicable environmental laws, regulations, permits, and relevant voluntary codes of practice. We are dedicated to continuous improvement in environmental management through proactive planning, innovation, and collaboration.

Environmental Principles and Guidelines

1. Responsibility and Compliance

Environmental protection is the responsibility of every employee, contractor, and consultant. All personnel are required to comply with applicable environmental requirements and the Company’s internal standards. Where such standards are absent or insufficient, IMPACT will apply best management practices consistent with international industry norms.

2. Environmental Risk and Impact Management

- Identify, assess, and mitigate environmental risks associated with all operations, projects, and activities.
- Integrate climate-related risk considerations into operational and strategic decision-making.

3. Conservation and Biodiversity

- Protect and conserve local ecosystems, flora, fauna, and water resources potentially affected by our activities.
- Avoid or minimize habitat disturbance through planning, monitoring, and rehabilitation.

4. Resource Efficiency and Waste Management

- Prioritize waste reduction, recycling, reclamation, and reuse across all operations.
- Specify biodegradable and environmentally responsible products wherever feasible.
- Optimize energy and water use to reduce our carbon footprint and promote efficiency.

5. Local Sourcing and Community Support

- Source materials and supplies locally whenever possible to reduce transportation impacts and support regional economies.
- Engage with local stakeholders and Indigenous communities to ensure transparency, inclusion, and mutual benefit.

6. Reporting and Accountability

- Report all environmental incidents, spills, or non-compliance events promptly to management and regulatory authorities as required.
- Maintain transparent communication with stakeholders regarding our environmental performance and commitments.

7. Site Rehabilitation and Closure

- Restore disturbed areas to safe and stable conditions consistent with community expectations and regulatory requirements.
- Incorporate progressive reclamation practices throughout the project lifecycle.

Continuous Improvement and Review

This Policy will be reviewed annually or as needed to reflect evolving best practices, legal requirements, and stakeholder expectations. IMPACT remains committed to advancing our environmental, social, and governance (ESG) performance as an integral part of our long-term success.
